

HAFIZA ZOYA JAMAL

Web Developer | Python Developer

Multan, Pakistan | zoyajamal775@gmail.com | +923131993379

Career Objective:

A Computer Science student who is enthusiastic and detail-oriented with solid foundations of front-end development, WordPress and python programming. I want to apply my knowledge of web technologies, problem solving, and data driven thinking towards innovative projects focused on improving user experiences and facilitating business growth, along with experience in customizing and managing WordPress websites. I'm ready to learn, adapt, and grow in a professional environment, whilst delivering high quality outcomes.

Technical Skills:

- **Front-End Development:** HTML, CSS, JavaScript, WordPress/Shopify basics
- **Programming Languages:** Python, C++, SQL, Object-Oriented Programming
- **Tools & Platforms:** Visual Studio Code, Anaconda, Dev, WooCommerce, WordPress Plugins
- **Data & ML Basics:** Basic Machine Learning concepts
- **Office Tools:** MS Word, Excel, PowerPoint
- **Additional Skills:** Freelancing, Virtual Assistance
- **Soft Skills:** Problem Solving, Teamwork, Creativity, Adaptability

Education:

Bachelors of Science in Computer Science (BSCS)

Women University Multan — 6th Semester

Current CGPA: 3.79 / 4.00

Projects:

- **Portfolio Website:** I designed and developed my personal portfolio website completely from scratch using HTML and CSS. The site showcases my skills, projects, and contact information in a simple, clean, and responsive layout.
- **WordPress Portfolio:** I designed and developed my portfolio static page from WordPress using WooCommerce, themes and plugins.
- **Age Calculator:** An Age Calculator web application developed using HTML, CSS, and JavaScript as part of my CodeAlpha Internship.
- **Payment Form:** I developed a simple yet clean Payment Form using HTML and CSS to practice frontend design and form-handling structure.
- **Pizza-Café:** This web page was created as part of our class activity, where we practiced building structured layouts using HTML and CSS.
- **Dark-Calculator:** This is my first ever project created using Python, where I built a fully functional Dark Theme Calculator.

- **Password-Generator:** This is a Password Generator that I created using Python.
- **Coffee-Bar App:** This project helped me practice Python basics like functions, conditionals, and user input handling.
- **Task-Generator:** This is a small Task Generator project that I created using Python.
- **Bulb ON/OFF:** This is a simple Bulb ON/OFF project that I created using HTML, CSS, and JavaScript.
- **Truth-Dare Game:** This is a fun Truth Dare Game that I created using HTML, CSS, and JavaScript.
- **Tic-Toa Game:** This is a Tic Tac Toe game that I created together with my university group fellows using Python.
- **Rock-Paper-Scissor Game:** The game I also created using HTML, CSS and JavaScript.
- **Rotating 3D Cube:** Developed a Rotating 3D Cube simulation using Python, showcasing fundamental 3D graphics concepts such as rotation matrices, perspective projection, and real-time animation.
- **Shading:** Created an Animated Blue Gradient Shading project using Python, focusing on smooth color transitions and dynamic visual effects.
- **Simulation:** Developed a Red Bouncing Ball Simulation using Python, and fundamental simulation logic in Python.
- **Texture mapping:** Developed a Texture Mapping project using Python (Pygame) to map image textures onto graphical objects in a 2D/3D simulation environment.
- **Z-axis effect:** Developed a 3D Ball Simulation with Z-axis effect using Python, demonstrating depth, motion, and realistic perspective in a virtual environment.
- **Feedback Project:** Developed a Feedback Management System using JavaScript and PHP as part of my academic project.
- **Academic Submission Form:** Academic Submission Form Developed using JavaScript and PHP to manage submissions efficiently with proper validation and backend processing.

Experience:

- I have done 6 Weeks Internship of Office Management at The Women University Multan (August 2025-September 2025).
- I have done an Internship of Web Development from CodeAlpha on Remote base (15 December 2025-15 March 2026).
